Proprioception II : Bodies in Space

**Concordia
University**

EV building:

1515 St Catherine St.
West, north-east corner
of St Catherine & Guy

Room 10.625

Ethnography Lab

Monday Feb 26

17:00-19:00

Proprioception: the physiological phenomenon of the sense of self in space. Proprioception is knowing and sensing one's orientation: It knowing where self ends and the rest begins – a physical & material mode of attention often overlooked in academia's text-based world. This workshop attunes participants to a *sense of self & other*-- & the implications for conducting interpersonal research through movement exercises, followed by discussion & activity. The space is wheelchair accessible & activities are tailored to participants' mobilities. For accessibility questions contact: Alix Johnson: albajohn@ucsc.edu
