

When we think about space, we often think about stars, galaxies, or astronauts – but there is so much more to know and explore. Join me as I share my unconventional journey to the space sector - a path that's been anything but straight and full of surprises.

In this talk, we'll explore the exciting realms of space utilization and exploration, from using satellites to improve public safety, climate change monitoring, and disaster management, to venturing into space astronomy to uncover the secrets of the universe, as well as the various needs of space travel. We'll also uncover how ideas transform into opportunities through collaboration, planning and management, how humanity comes together to achieve giant leaps in knowledge, and ways you can be a part of this journey.

This is an invitation to discover how diverse skills and interests come together to shape the future of space - and perhaps finding your own place among the stars.
