

SCHOOL OF HEALTH

**School of Health: Call for research proposals
Q & A**

Q: Is this meant to be seed funding to leverage funds for CIHR or NSERC grants?

A: No. The goal of this funding opportunity is to have riskier projects that would not normally be funded by those programs.

Q: How large should the team be?

A: There is no set size.

Q: Can the team have external collaborators?

A: Yes, but any funds requested from the School of Health must go toward Concordia researchers only. External collaborators should have their own funds for the research being done at their institution.

Q: How big can the budget be?

A: The budget should be based on the methodologies needed to achieve impactful results. As such, there is no set limit for the budget. A GANTT chart should be included demonstrating that the budget is aligned with specific aims and timelines - this will be used to help us determine whether we allocate partial or full funds.
