Search operators - boolean

Other search operators

Exact phrase searching

Quotation marks (" ") are used to search for an expression in its exact form (phrase searching). They are useful for expressions containing more than one word.

For example, "rite of passage" will find these words written together, without their variants, in that order.

Truncation

The asterisk (*), placed at the end of a word, replaces 0, 1 or more characters.

For example, chat* will find chat, chats, chatte, chaton, but also château, Chateaubriand, Châtelaine... It will not, however, find matou, félin, or lynx.

Another example: relig*: relig*ion*, relig*ions*, relig*are*, relig*ious*, relig*ieux*, relig*ieuse*.

What is an annotated bibliography?

An annotated bibliography is a list of the sources (e.g. books, journal articles, etc.) that you used to research a topic in preparation for writing a term paper. In an annotated bibliography, each source in the list is followed by a brief descriptive and evaluative paragraph of 4-5 sentences (approx. 150 words or more), which can also include its relevance to your paper topic. An annotated bibliography should inform the reader by providing a clear indication of each source's relevancy, accuracy and quality.

General guidelines

- Carefully read the course assignment instructions.
- If you are still unclear, check with your professor on the **type** of annotated bibliography that is required for the assignment.
- Main Types of Annotated Bibliographies:
 - **Summary/descriptive** – provides a concise overview of the main arguments, evidence presented, and conclusions
 - **Critical/evaluative** – in addition to providing an overview, analyzes the content; comments on the strengths and weaknesses of the arguments, evidence, and conclusions; explains the usefulness of the source for your research topic.
 - **Combination** - most annotated bibliography assignments require that you include both an overview and evaluative comments.
- Most annotated bibliographies organize sources alphabetically by the first author's last name.
- Consistently follow the rules of the style guide ([APA](#), [MLA](#), [Chicago](#), [Other Guides](#)) that is indicated in your course assignment instructions; the style guide will detail what information to include for each type of source and how it should be formatted.

Why evaluate? General criteria

Research requires **critical thinking** to determine if the sources that you found for your assignments are **credible** and meet academic research standards.

Credible sources are **reliable, trustworthy** sources of information. **Use your own judgment** to question the reliability of the source and evaluate its quality and relevance to your research. Here are some **questions** to bear in mind when trying to determine the **reliability** of a source:

Who is the **author** of the source?

- What is the author's expertise?
- What is the author's motivation?

Is this information **reliable**?

- What degree of currency is needed? When was it published?
- What was the editorial process? Was the source vetted by peers?

Is this information **relevant** to your topic?

- How relevant is this information to your specific need?
- What perspectives are given? Should you consider other perspectives?

Learn to **apply** these types of **questions** to all sources that you use, including books, articles, websites, news, and media materials. Always **examine critically** all sources that you use. For detailed guidelines on evaluating each type of source, consider the criteria by format for [books](#), [articles](#), [websites](#) and [media](#).
